

## 55 Americans Have Died Following COVID Vaccination, Norway Deaths Rise To 29

BY TYLER DURDEN

SATURDAY, JAN 16, 2021 - 18:01

Amid increasing calls for **suspension of the use of mRNA-based COVID-19 vaccines** produced by companies such as Pfizer, **especially among elderly people**, the situation in Norway has escalated significantly as the Scandi nation has now registered a total of 29 deaths among people over the age of 75 who've had their first COVID-19 vaccination shot.

[As Bloomberg reports](#), this adds six to the number of known fatalities in Norway, and also lowers the age group thought to be affected from 80.

Until Friday, Pfizer/BioNTech was the only vaccine available in Norway, and **“all deaths are thus linked to this vaccine,”** the Norwegian Medicines Agency said in a written response to Bloomberg on Saturday.

“Most people have experienced the expected side effects of the vaccine, such as nausea and vomiting, fever, local reactions at the injection site, and worsening of their underlying condition.”

Norway’s experience has prompted the country to suggest that Covid-19 **vaccines may be too risky for the very old and terminally ill**... the exact group that ‘the science’ shows are actually at risk from this virus.

Pfizer and BioNTech are working with the Norwegian regulator to investigate the deaths in Norway, Pfizer said in an e-mailed statement. **The agency found that “the number of incidents so far is not alarming, and in line with expectations,”** Pfizer said.

However, it's not just Norway as [The Epoch Times' Zachary Stieber reports](#) that **fifty-five people in the United States have died after receiving a COVID-19 vaccine**, according to reports submitted to a federal system.

Deaths have occurred among people receiving both the Moderna and the Pfizer-BioNTech vaccines, according to the reports.

**In some cases, patients died within days of receiving a COVID-19 vaccine.**

One man, a 66-year-old senior home resident in Colorado, was sleepy and stayed in bed a day after getting Moderna’s vaccine. Early the next morning, on Christmas Day, the resident “was observed in bed lying still, pale, eyes half open and foam coming from mouth and unresponsive,” the VAERS report states. “He was not breathing and with no pulse.”

In another case, a 93-year-old South Dakota man was injected with the Pfizer-BioNTech vaccine on Jan. 4 around 11 a.m. About two hours later, he said he was tired and couldn’t continue with the physical therapy he was doing any longer. He was taken back to his room, where he said his legs felt heavy. Soon after, he stopped breathing. A nurse declared a do-not-

It's not just the old and frail, in Israel, which proudly lays claim to the greatest vaccination effort in the world (largest percentage of the population inoculated),

[As RT reports](#), **at least 13 Israelis have experienced facial paralysis after being administered the Pfizer Covid-19 vaccine**, a month after the US Food and Drug Administration reported similar issues but said they weren't linked to the jab.

Israeli outlet Ynet [reported](#), citing the Health Ministry, that officials believe the number of such cases **could be higher**.

“For at least 28 hours I walked around with it [facial paralysis],” one person who had the side effect told Ynet.

“I can't say it was completely gone afterwards, but other than that I had no other pains, except a minor pain where the injection was, but there was nothing beyond that.”

Ynet quoted Prof. Galia Rahav, director of the Infectious Diseases Unit at Sheba Medical Center, who said she **did not feel “comfortable” with administering the second dose to someone who had received the first jab and subsequently suffered from paralysis**.

“No one knows if this is connected to the vaccine or not. That's why I would refrain from giving a second dose to someone who suffered from paralysis after the first dose,” she told the outlet.

Finally, [as we noted yesterday](#) following the news of rising post-vaccination deaths in Norway, **health experts from Wuhan, China, called on Norway and other countries to suspend the use of mRNA-based COVID-19 vaccines** produced by companies such as Pfizer, especially among elderly people.

[China's Global Times](#) reports Chinese experts said the death incident should be assessed cautiously to understand whether the death was caused by vaccines or other preexisting conditions of these individuals.

**Yang Zhanqiu, a virologist from Wuhan University**, told the Global Times on Friday that the death incident, if proven to be caused by the vaccines, showed that the effect of the Pfizer vaccine and other mRNA vaccines is not as good as expected, as the main purpose of mRNA vaccines is to heal patients.

...

A Beijing-based immunologist, who requested anonymity, told the Global Times on Friday that **the world should suspend the use of the mRNA COVID-19 vaccine represented by Pfizer, as this new technology has not proven safety in large-scale use or in preventing any infectious diseases**.

**Older people, especially those over 80, should not be recommended to receive any COVID-19 vaccine**, he said.

**All of which is a problem since it is the elderly who are at most risk (quite frankly at any real risk at all) and thus who need the protection the most.**

The Chinese health experts instead say that **the most elderly and frail should be recommended to take medicines to improve their immune system.**

Of course, one cannot help but note the irony of scientists from the source of the plague that has killed millions around the world and destroyed lives/economies almost everywhere, is now calling for the cessation of the process to protect against the plague.
