Meanwhile 6,662 DEAD 299,066 INJURED reported: European database of adverse reactions to COVID-19 'vaccines'

BY GREATREJECT · 18/04/2021

The European database of reports of suspected reactions to medication, EudraVigilance, tracks reports of injuries and deaths following the experimental Covid-19 'vaccines'.

A banner for EudraVigilance, the European database of suspected adverse drug reaction reports. The banner has a blue header with the European Union flag and the text "EudraVigilance - European database of suspected adverse drug reaction reports". Below the header is a white box with text explaining that the European Medicines Agency publishes this data for transparency. The main body of the banner is black with white text stating: "COVID-19 Vaccine Adverse Drug Reactions 6,662 DEAD 299,065 Injuries Through April 10, 2021". It lists four vaccine types: COVID-19 MRNA VACCINE MODERNA (CX-024414), COVID-19 MRNA VACCINE PFIZER-BIONTECH, COVID-19 VACCINE ASTRAZENECA (CHADOX1 NCOV-19), and COVID-19 VACCINE JANSSEN (AD26.COV2.S). The footer contains the European Medicines Agency logo and the EudraVigilance logo.

 EudraVigilance - European database of suspected adverse drug reaction reports

The European Medicines Agency publishes these data so that its stakeholders, including the general public, can access information that European regulatory authorities use to review the safety of a medicine or active substance. **Transparency** is a key guiding principle of the Agency.

EudraVigilance 

Here is what EudraVigilance says about their database:

*This website was launched by the European Medicines Agency in 2012 to provide public access to reports of suspected adverse reactions (also known as suspected side effects of medicines). These reports are submitted electronically to EudraVigilance by national medicines regulatory authorities and by pharmaceutical companies that hold marketing authorizations (licenses) for the medicines.*

*EudraVigilance is a system for collecting reports of suspected adverse reactions. These reports are used for evaluating the benefits and risks of medicines during their development and for monitoring their safety after their authorisation in the European Economic Area (EEA). EudraVigilance has been in operation since December 2001.*

*This website was created to comply with the EudraVigilance access policy, which was developed to improve public health by supporting the monitoring of the safety of medicines and to increase transparency for stakeholders, including the general public.*

*The European Medicines Agency's Management Board first approved the*

*EudraVigilance access policy in December 2010. In December 2015, a revision was approved by the Governing Board based on the 2010 pharmacovigilance legislation. The policy aims to give stakeholders, such as national medicines regulatory authorities in the EEA, the European Commission, healthcare professionals, patients and consumers, as well as the pharmaceutical industry and research organizations, access to reports on suspected side effects.*

*Transparency is an important guiding principle of the Agency and is critical to building trust in the regulatory process. By increasing transparency, the Agency can better meet the growing need of stakeholders, including the general public, for access to information.*
